1

Abstract

A shoe having an outsole with sizing indicators on the bottom of the outsole provides a 2 shoe size indication system and methods useful for quickly and accurately measuring a person's 3 foot to determine a proper shoe size to purchase. A shoe sizing indication system includes a heel 4 placement indicator and shoe size indicator lines placed at distances from the heel placement 5 indicator corresponding to standard shoe sizes. A shoe with shoe size indicators on the outsole 6 allows quick, accurate, and convenient determination of a proper shoe size by customers without 7 additional shoe fitting devices or materials or assistance by retail store personnel. 8 9 10 11.23 and and any and any and any
